

To whom it may concern: 4/20/99

I am in support of prominent  
labeling of irradiated food because this  
process can change a food's taste,  
texture & nutrients. Since those who  
are proponents of irradiated food <sup>APR 26 AY 39</sup> should ~~be~~  
feel confident in the product, I don't see  
why anyone should object to the labeling.
